

EASY-TO-INSTALL

To sum up all the arguments, what makes ONDULINE® sheets easy to install?

- Easy to handle and transport due to its light weight (only 3 kg/m²).
- An intuitive installation: smart lock system (embossed lines), possibility of increasing the overlap to avoid cutting, easy to cut without professional tools (about 20 seconds to cut a sheet with just a cutter only), easy to fix (10 seconds per fixing/screw with drill).*
- A flexible material (possibility to cover roofs of many shapes, ideal for renovation, adapting irregular structures -battens or deck-).
- A qualitative support (print and digital communication support: leaflet, brochures and installation videos, teams support).
- 5 golden rules for a perfect installation, no more.

Easy to handle and transport.

ONDULINE® sheets are very light **with a weight of only 3 kg/m²**. In comparison to heavier roofing materials, it means comfort at every level, from transport to installation.

First, the sheets are easy to transport in a simple car, no need to have a particular means of transport such as a van or a small truck. Our compact versions (ONDULINE EASYFIX® COMPACT, ONDULINE EASYLINE®) simply fit in a car trunk and our standard versions can fit in the back seat of your car.

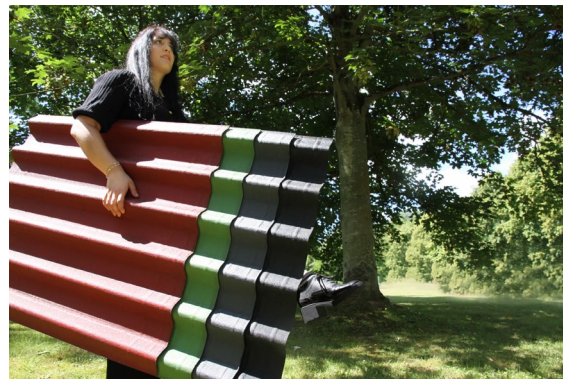

Second, ONDULINE® sheets can be transported up on the roof by only one person.

*Timing tests done internally with a first time roofer DIYer with ONDULINE EASYFIX® sheets.

And even more, several sheets can be carried at the same time by only one person for time saving.

You buy it, load it, and transport it, all on your own.

An intuitive installation.

Smart lock system

ONDULINE® sheets are very easy to install thanks to a simple and **self-explanatory covering system**. Some of ONDULINE® sheets features **the smart lock system**. The embossed lines act as an installation guide making the project quicker and easier. **Embossed lines show you the height of the overlap between the sheets** and help you position the sheet straight. Thanks to the embossed lines you do not need to take measurements.

Overlaps can be exceeded if necessary to avoid cut outs. You can **play on the width of the overlaps to avoid cutting**.

Cutting not mandatory

Easy to fix

Fixation of ONDULINE® sheets is also very simple. Sheets are fixed with either ONDULINE® MONOBLOC NAIL or ONDULINE® UNIVERSAL SCREW. **You do not need to pre-drill the holes**. The sheets are placed on the roof overlapping each other, nails or screws are fixed in the required order, and that's it. **Fixing time per fastener was measured to be only 10 sec** for a beginner DIYer.* This measure was taken internally using ONDULINE® UNIVERSAL SCREW and a drill.

ONDULINE® sheets are **easy to cut** and do not require expensive professional tools. You can use a saw-pad or just a cutter. Based on our experience and internal test, for a beginner DIYer, **cutting a sheet** in the vertical only **takes 20 seconds and up to one minute in the horizontal with a cutter!**

Easy to cut

MORE FAQ ABOUT EASY-TO-INSTALL

Simple to install.

Simplicity is key for secured and reliable installations. ONDULINE® success in its different domain of applications clearly lies into its easiness of installation. **No previous roofing skills are required** to install an ONDULINE® roof.

A flexible material.

An ONDULINE® sheet due to its flexibility allow to cover roofs of many different shapes. They can be adapted on different types of roofs with **non perfectly flat structures**, especially in **renovation projects**. The sheets can be installed on different supports, continuous or discontinuous.

A qualitative support.

Onduline® provides great support for all its products through different channels:

- Leaflets, brochures and catalogues
- Installation videos (on our YT channels)
- Teams support to guide you

How long does it take to install an ONDULINE® roof?

Based on our experience and internal timed tests, we are able to communicate the following installation times*:

BEGINNER DIYer (never installed a roof/occasional DIYer)

- 2h for 15m²/simple cutting

EXPERIENCED DIYer (skilled and methodological DIYer)

- 1h30 min for 15m²/simple cutting

*Tests done internally on wooden structure full deck with ONDULINE® UNIVERSAL SCREW/ONDULINE EASYFIX® and EASYFIX® COMPACT.

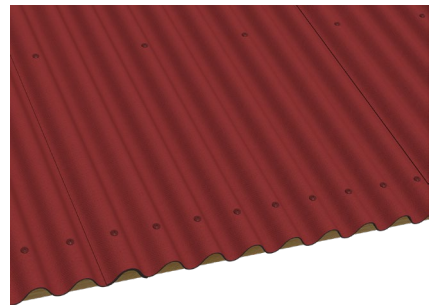

5 golden rules (transversal to all products) for a perfect installation:

1 Install on a wooden structure, full deck or discontinuous, as well as on metal purlins, respecting the spacing recommended in the installation guide for the ONDULINE® sheet you have chosen.

2 Respect the number of fasteners recommended (+-10/m² depending on the product) and use ONDULINE® brand fasteners which are designed to guarantee lasting waterproofing -with 16 mm washer head minimum- and the best aesthetics.

3 At eaves, overlaps and at the ridge, there must be fasteners on top of every corrugation.

4 Respect a **maximum overhang of 7 cm over the gutter**.

5 Start the 2nd row with a half sheet in order to avoid extra thickness in certain places which could affect the aesthetics.

HIGHLIGHT EASY-TO-INSTALL ON SOCIAL MEDIA

Below some ideas to use our your social networks to highlight the ease of installation of our products.

Introducing the Solution for easy roofing: ONDULINE® roofing sheets!

Are you ready to embark on a DIY roofing project? Look no further, because we have the perfect solution for you – ONDULINE® roofing sheets! Experience the joy of hassle-free handling and transportation while achieving professional-quality roofing results.

🔧 Effortless Handling: our roofing sheets are designed with you in mind. Weighing significantly less than traditional roofing materials (only 3 kg/m²), they are a breeze to handle, making your DIY project a stress-free endeavour. No need to worry about heavy lifting or strained muscles – our roofing sheets are here to lighten the load.

🚚 Simple Transport: transporting roofing materials has never been this easy. Thanks to their lightweight nature, our bitumen roofing sheets can be conveniently loaded into your vehicle without overburdening it. Say goodbye to renting expensive heavy-duty trucks or struggling with awkwardly shaped materials, our roofing sheets fit right into your car!

⌚ Time-Saving Installation: the lightweight design doesn't just make transportation easy; it also speeds up the installation process. You'll be amazed at how quickly you can lay down our roofing sheets all by your own. Spend less time on backbreaking labour and more time admiring your work.

💰 Cost Savings: another satisfying aspects of choosing ONDULINE® sheets is the substantial cost savings. By opting for a DIY approach, you eliminate the need to pay a professional roofer, saving you a significant amount of money.

🎨 Versatile Design: our roofing sheets are available in a variety of styles and colours, allowing you to choose the perfect look to complement your property's aesthetics. Whether you're going for a classic, modern, or rustic appearance, our range of options ensures that you'll find the ideal fit.

🔧 DIY Friendly: you don't need to be a roofing expert to install our bitumen sheets. With user-friendly instructions and simple installation methods, you can achieve professional-quality results even without prior experience. Join the ranks of satisfied DIYers who have transformed their spaces with ease.

👥 Collaborative Venture: moreover, tackling this project can be a collaborative venture, whether with

your children, your partner, or your friends. Together, you can share the excitement and pride of creating something by yourself. Working as a team not only makes the process more enjoyable but also strengthens bonds and creates lasting memories.

🛠️ Quality Support, Every Step: we understand that embarking on a DIY project can raise questions. That's why our dedicated support team is here for you! From installation tips to troubleshooting, we've got your back. You're never alone on your roofing journey.

Ready to embark on your DIY roofing journey? Choose ONDULINE® roofing sheets for unmatched ease of handling, simple transportation, and great results. Don't let heavy materials weigh down your project!

Your desired roof is now within reach.
